Tree Removal & Stump Grinding

OAK BROS NEW TREE REMOVAL DEVICE

HEARTLAND

Altec's Heartland is designed to remove limbs and takedown trees without an operator ever having to leave the ground or touch a piece of the tree. The unit is completely operated by way of a remote control, allowing operators to remove limbs and takedown trees while staying away from potentially hazardous job sites, increasing safety, productivity and efficiency.

The recent purchase of Altec's Heartland will significantly reduce job times, allowing Oak Bros to accept more projects at lower costs.
